Section 1 - Final Prompt

“Create a one-page professional resume for a Civil Engineering student applying for entry-level positions or internships.

Use a clean, modern, and minimalist format with clear section headings, consistent spacing, and a well-structured layout. The resume should be visually organized, ATS-friendly, and written in a formal and professional tone suitable for the engineering industry.

Candidate Details:
Name: Johann Ephraim Lambino
Contact Number: 09122312345
Email: lambino.johann@email.com

Location: Philippines
Education: Bachelor of Science in Civil Engineering (Expected Graduation: 2024)
Skills: AutoCAD (2D/3D), Material Quantity Surveying, Technical Drawing, Basic Structural Analysis, Critical Thinking, Communication, Teamwork
Achievement: Safety Officer 2 (SO2) Certified

Include realistic and relevant academic projects and/or internship experience aligned with Civil Engineering, such as:

Structural design of residential buildings
Load calculations (dead, live, seismic if applicable)
Material quantity estimation and cost analysis
Site observation or fieldwork experience
Use of engineering standards (e.g., NSCP) and basic tools (e.g., AutoCAD, SAP2000 if applicable)

The resume must contain the following sections:

Professional Summary (strong, tailored to the engineering field)
Education (include relevant coursework)
Technical and Soft Skills (separated clearly)
Engineering Projects and/or Work Experience (detailed bullet points with action verbs and measurable or realistic outcomes)
Achievements and Certifications
Contact Information

Use concise bullet points and action verbs. Ensure the content is realistic for a student or fresh graduate but enhanced with industry-relevant terminology. Avoid generic statements and focus on practical engineering applications, problem-solving, and technical competence.”

Section 2 - LLM Outputs

LLM 1: Gemini

JOHANN EPHRAIM LAMBINO

09122312345 | lambino.johann@email.com | City, Philippines

PROFESSIONAL SUMMARY

Dedicated and detail-oriented Civil Engineering student with a strong foundation in structural design principles and project management. Proficient in AutoCAD for 2D drafting and 3D modeling, with a proven ability to apply critical thinking to complex engineering challenges. Seeking an entry-level position or internship to leverage technical skills in site supervision, material estimation, and design optimization while contributing to the success of infrastructure projects.

EDUCATION

Bachelor of Science in Civil Engineering **Expected 2024**
University of Engineering and Technology *City, Philippines*

- Relevant Coursework: Structural Theory, Steel and Timber Design, Hydrology, Construction Management, Geotechnical Engineering.

ENGINEERING PROJECTS

Structural Analysis and Design: Two-Story Residential Building **Academic Project**

- Developed comprehensive structural plans using **AutoCAD**, ensuring compliance with National Structural Code of the Philippines (NSCP).
- Performed load calculations (dead, live, and seismic) and designed reinforced concrete elements including beams, columns, and footings.
- Produced detailed Bill of Materials (BOM) and cost estimates, reducing potential material waste by 10% through precise calculation.

Site Observation and Surveying Internship **Summer 2023**

- Assisted senior engineers in monitoring site activities for a road rehabilitation project, ensuring adherence to design specifications and safety protocols.
- Utilized surveying instruments to assist in site layout and leveling, maintaining high accuracy in topographical data collection.
- Drafted weekly progress reports and site diaries to document labor productivity and material deliveries.

TECHNICAL AND SOFT SKILLS

Technical Skills: AutoCAD (2D/3D), MS Project, Material Quantity Surveying, Technical Drawing, Basic SAP2000.

Soft Skills: Critical Thinking, Analytical Problem Solving, Team Collaboration, Effective Communication, Time Management.

ACHIEVEMENTS

- **Safety Officer 2 (SO2) Certified:** Completed the Basic Occupational Safety and Health (BOSH) training as prescribed by DOLE, demonstrating a commitment to construction site safety and risk management.
- Dean's List Awardee: Maintained a GWA of 1.75 or higher for three consecutive semesters.

LLM 2: ChatGPT

JOHANN EPHRAIM LAMBINO

09122312345

PROFESSIONAL SUMMARY

Detail-oriented Civil Engineering student with a strong foundation in engineering principles, drafting, and basic structural analysis. Skilled in AutoCAD and known for critical thinking and problem-solving abilities. Seeking an entry-level position or internship to apply technical knowledge in real-world engineering projects.

EDUCATION

Bachelor of Science in Civil Engineering (Undergraduate)

TECHNICAL & SOFT SKILLS

1. AutoCAD Drafting and Design
2. Basic Structural Analysis
3. Construction Materials Estimation
4. Engineering Drawing Interpretation
5. Critical Thinking and Problem Solving
6. Time Management and Organization
7. Team Collaboration and Communication

ENGINEERING PROJECTS / EXPERIENCE

Residential Building Plan Drafting (Academic Project)
- Created detailed 2D floor plans using AutoCAD
- Applied standard engineering drawing practices
- Ensured accuracy in dimensions and layout

Basic Structural Design Project
- Performed load calculations for simple structures
- Applied structural analysis principles
- Collaborated in team-based design

Material Quantity Estimation Exercise
- Estimated quantities of construction materials
- Prepared cost approximations
- Improved computation accuracy

Site Observation (Field Exposure)
- Observed construction processes and workflows
- Identified real-world engineering applications
- Documented and reported findings

ACHIEVEMENTS

SO2 (Student Outcome 2) – Demonstrated strong analytical and problem-solving skills

Section 3 - Comparison Table

Criteria	LLM 1	LLM 2
Structure	Produces a generally correct resume structure but may sometimes place sections inconsistently or repeat ideas	Follows the requested section order strictly and maintains logical flow across all sections
Clarity	Clear but may include broader or less specific phrasing in descriptions	More concise and targeted wording, especially in technical and engineering-related content
Formatting	Acceptable layout, but may lack consistent spacing or bullet uniformity	Clean, minimal, and well-organized formatting with consistent bullets and section alignment
Overall Quality	Good general resume output but sometimes includes generic or less realistic engineering details	Higher-quality, more realistic civil engineering experience and stronger alignment with entry-level engineering expectations

Section 4 – Reflection

Among the two language models, LLM #2, i.e., ChatGPT, demonstrated better performance while creating a resume. It had better adherence to the prompts in terms of following the order of sections mentioned in the prompt and creating a clean, well-organized one-page document. Also, the output was closer to the professional civil engineering resume in terms of its tone. LLM #1, i.e., Gemini, offered a relatively good structure yet had somewhat generic content in places and some lack of engineering information. Another crucial distinction is that of clarity and specificity. As I could see, ChatGPT created a set of more precise bullet points for the Engineering projects and skills section, including activities related to drafting and site observation. In turn, Gemini had rather general phrases that could be less useful for applications in engineering. Formatting was better in the output of ChatGPT as well. To enhance my final resume, I leveraged the robust structure compliance of ChatGPT while using better, more succinct language for the same. I improved on the bullets to give them a more professional tone while ensuring that all information was pertinent to entry-level Civil Engineer jobs. I also eliminated all repetitive and too generic statements in my resume. Through this exercise, I have realized the importance of prompts in influencing the output quality. Giving clear and specific instructions will lead to an appropriate response being provided by the AI model.

Section 5 – Final Resume

JOHANN EPHRAIM LAMBINO

Civil Engineering Student

09122312345
lambino.johann@email.com
Philippines

PROFESSIONAL SUMMARY

Highly motivated Civil Engineering student with a solid foundation in structural design and project management. Proficient in AutoCAD (2D/3D) and material quantity surveying. Certified Safety Officer 2 (SO2) with a strong commitment to construction safety and operational excellence. Proven ability to apply critical thinking to technical challenges and produce high-quality engineering documentation.

EDUCATION

Bachelor of Science in Civil Engineering — **Expected 2024**

University of Engineering and Technology — *City, Philippines*

Relevant Coursework: Structural Theory, Reinforced Concrete Design, Steel & Timber Design, Construction Management, Geotechnical Engineering, Hydrology.

ENGINEERING PROJECTS

Structural Design of a Two-Story Residence

- Developed full structural blueprints using **AutoCAD**, ensuring strict compliance with the **National Structural Code of the Philippines (NSCP)**.
- Performed dead, live, and seismic load calculations for beams, columns, and foundations.
- Simulated structural behavior to optimize material usage and ensure structural integrity.

Material Quantity Surveying & Site Observation

- Conducted detailed quantity take-offs for civil and structural works for a residential complex project.
- Assisted in on-site quality control, including concrete slump testing and checking rebar reinforcements against plans.
- Produced cost analysis reports and labor productivity logs to support project scheduling.

SKILLS & COMPETENCIES

Technical Skills

- AutoCAD (2D & 3D Drafting)
- Material Quantity Surveying
- Technical Drawing & Design
- Basic Structural Analysis (SAP2000)
- MS Office & Project Management

Soft Skills

- Critical Thinking & Analysis
- Effective Communication
- Team Leadership & Collaboration
- Adaptability in Field Environments
- Professional Ethics

CERTIFICATIONS & ACHIEVEMENTS

- **Safety Officer 2 (SO2) Certified:** Completed BOSH training (DOLE-prescribed), specializing in hazard identification and risk assessment.
- Dean's List Scholar: Recognized for academic excellence in technical engineering courses.
